

International College of Angiology

51st Annual World Congress

CALL FOR ABSTRACTS

Program Highlights

October 24-28, 2009

Beijing Railway Hotel • Beijing, China

John B. Chang, MD, FICA, FACS
Program Chairman

Zhong-Gao Wang, MD
Honorary Chairman, Regional Organizing
Committee

Jian Zhang, MD
Chairman, Regional Organizing Committee

Shen-ming Wang, MD
Co-Chairman, Regional Organizing Committee

Yong-quan Gu, MD
Secretary General, Regional Organizing
Committee

Local Organizers

Chinese Medical Association
Xuanwu Hospital, Capital Medical University

ICA's Opening Ceremony for the Congress will be October 24, 2009 and will convene through October 28, 2009.

ICA 2009 • A Unique Blend of Disciplines Providing a Forum for the Synthesis of a State-of-the-Art Program!

Join your colleagues from around the world, earn CME, and explore key areas rapidly expanding in cardiovascular medicine and surgery. ICA 2009 is designed to meet the specific educational needs of medical professionals involved with the management and treatment of cardiovascular diseases as they are encountered by primary care physicians, vascular, general, thoracic, cardiovascular surgeons, cardiologists, neurologists and neurosurgeons, and interventional radiologists.

The overall goal is to bring together basic and clinical scientists to share universally current and new knowledge and techniques in angiology.

This annual world congress will feature an internationally renowned faculty, and recognized leaders will join together to discuss state-of-the-art techniques in the diagnosis and treatment of vascular disease. Case presentations, didactic lectures, panel discussions, question, and answer sessions will highlight the most challenging and controversial procedures performed in interventional medicine.

We encourage all of our colleagues to participate in this growing educational program by either submission of a formal abstract for standard oral or poster presentation.

PROGRAM HIGHLIGHTS

- Vascular and Endovascular Controversies: An Update
- New Concepts in Endovascular and Open Repair of TAA
- Current Status of EVAR and Future Horizons
- Technical Pitfalls in Peripheral Angioplasty & Stenting Procedures
- Technical Merits in Complex Vascular Reconstruction
- Echocardiography and its Limitations as a Diagnostic Tool
- Hot Topics in Percutaneous Coronary Intervention
- The Peripheral Dilemma for the Cardiologist—An Interdisciplinary Effort
- What's New in Coronary Artery Disease—Interventional Cardiology and Surgical Pitfalls
- Percutaneous Valve Replacement—Where Do We Stand?
- Where are We Going With CT Angiography?
- Rescuing the Heart After Myocardial Infarction
- New Imaging Technologies
- Cardiac Assist Devices for the Failing Heart
- Cardiac Transplantation—Current Concepts
- Current State-of-the-Art in Carotid Stenting
- Current State-of-the-Art of Coronary Bypass Off Pump
- Hemodialysis Access Procedures
- Medical Management of Cardiovascular Disease
- Technical Details in Peripheral Angiogram, Renal and Distal Angioplasty, and Stent Procedures
- Techniques to Limit Neurological Events After CEACAS
